## Multiplication Tic Tac Toe

Player One rolls $2 \times 0-9$ or $2 \times 1-12$ dice, finds the product and covers both spaces (e.g. $4 \times 6=24 ; 6 \times 4=24$ ) with bingo chips. (One space only would be covered if doubles are rolled.) The zero will represent the number 10. Player Two takes their turn. Players continue to alternate turns.

Goal: Build Tic Tac Toe, three or more in a row horizontally, vertically or diagonally.
One point per chip and remove from board so spaces are open again.
Roll your partner's space and capture for 2 points per chip.
Play for a set period of time.

Computer Dice can be found at: http://appincredible.com/online/dice-roller/

NB: On the game board of the Fluency Dice Game Challenge, the numbers are not aligned to the order of the multiplication table.
