What are services? Services are a subset of all allowable activities that the MEP can provide through its programs and projects. “Services” are those educational or educationally related activities that:

- directly benefit a migrant child;
- address a need of a migrant child consistent with the State’s comprehensive needs assessment and service delivery plan;
- are grounded in scientifically based research or, in the case of support services, are generally accepted practices; and
- are designed to enable the program to meet its measurable outcomes and contribute to the achievement of the State’s performance targets.

What are allowable activities that are not services?

Examples of allowable activities that are not services are activities related to:

- Parental involvement
- Administration of the programs
- Handing out leaflets to migratory families on available reading programs as part of an effort to increase the reading skills of migratory children

Although these are allowable activities, they are not services because they do not meet all of the criteria above.
