

Who We Are

The Northeast Migrant Education Program (NMEP) will ensure that high quality, coordinated, efficient, and comprehensive educational and advocacy services are provided to all eligible migrant students.

All qualifying students are eligible for services **free of charge**. Get in touch with us if you are interested in:

- Academic support, including tutoring and college admissions help
- Obtaining a High School Equivalency Diploma
- Participating in exciting and educational trips and programming

Other Resources

College Scholarships

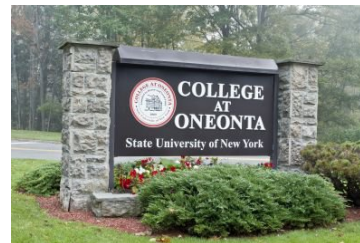

The Adolescent Advocate helps college-bound high school seniors complete applications for a variety of scholarship opportunities, including our local program's Juanita Crippen Scholarship.

CAMP at SUNY Oneonta

SUNY Oneonta's College Assistance Migrant Program is designed to help migrant students apply to, enter, and succeed during college. CAMP holds several events during the school year for high school students interested in learning more about the support system they provide for migrant students.

SUNY Oneonta Migrant Leadership Academy

During this free ten-day program, students experience college-level instruction, meet peers from across the state, and have the opportunity to earn college credits.

Academic Services

Tutoring

NMEP is committed to helping every student we serve succeed, whatever their needs. Throughout both the school year and the summer, our dedicated and effective tutors work with students to provide high quality instructional support, both in the home and at our Migrant Tutoring Centers. The tutors coordinate with families, teachers, and administration in order to fine-tune instruction to each student's needs.

College & Career Readiness

We want all our students to have the opportunity to pursue higher education if they choose to. The college application process can be confusing and time-consuming, but NMEP is happy to assist students and their families with completing applications, filing for financial aid, and applying for scholarships.

Regardless of their educational path, NMEP supports students as they search for the career that fits their individual strengths and passions.

Supporting Out-of-School Youth

For those under the age of 22 who no longer attend school, NMEP offers a variety of support services. Whether smoothing the transition for those who want to return to school, assisting students working to obtain a High School Equivalency Diploma, or connecting individuals with programs such as the Job Corps, NMEP's commitment to those we serve does not stop at the schoolhouse door.

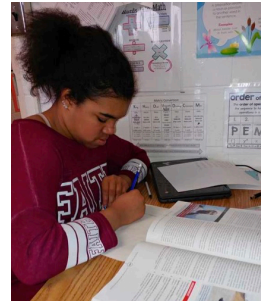

What We Offer

Summer Programs

Every summer, NMEP organizes programs for students in all of the counties we serve. Programming varies from year to year and is based on student interest. We strive to offer a varied menu of exciting and educational options that matches the diverse interests of our students!

Academic Services

NMEP strives to offer a caring and supportive helping hand to our students as they pursue their educational goals. Our dedicated tutors offer personalized instructional aid, and we are also available to help families with the college admissions process or to help students obtain a High School Equivalency Diploma.

Resources Across New York and Beyond

NMEP is proud to partner with METs across the state to provide students with an array of enrichment activities and scholarship opportunities.

2019 Summer Programs

Agriculture

Our first module began at the Cornell Cooperative Extension Learning Farm in Canton, where students got a big-picture view of all the ways it's possible to participate in agriculture. Students were able to see a hoof-trimmer at work, churned cream into butter, and toured a working sugar shack.

Down the road, at the St. Lawrence University Sustainability Farm, students learned about the different strategies farmers can use to preserve natural resources for the next generation. Students planted a pollinator-friendly wildflower garden, as well as clover that will serve as a cover crop.

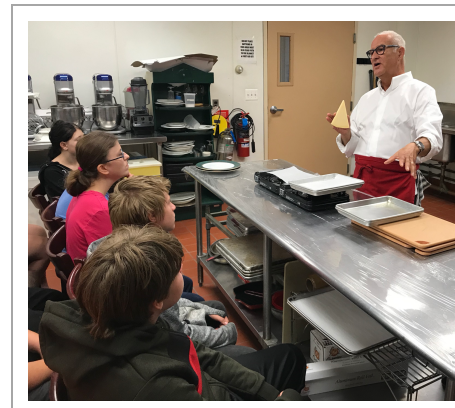

Left: At the Learning Farm, students attempt to identify agricultural equipment.

Right: Students enjoying the view from the Ranger School's Cathedral Rock.

Forestry

For our second module, we traveled to Wanakena, home of the SUNY-ESF Ranger School. After an individualized tour of the campus, students explored the Arboretum, where they learned to identify a wide variety of Adirondack tree species using leaves, pinecones, and other characteristics. Students then joined the Ranger School staff on a short hike to Cathedral Rock, where they were able to climb a classic fire tower and enjoy commanding views of the surrounding mountains and forests

Culinary Arts

Chef Neveu instructs an attentive (and hungry!) audience

The final summer module this year took place at Paul Smith's College in the Adirondacks, where students had the chance to work with Chef Bruno Neveu, the head of the Culinary Arts Department. In addition to a campus tour, students observed a gourmet cooking demonstration by Chef Neveu. Afterwards, they had the opportunity to test their own creativity by making personalized pizzas.
